Drug addiction is a common problem all over the world today. There are many forms of drug addiction but the most dangerous of all is the absolute dependence on it. Long term use of drugs causes permanent mental and physical sickness. Some kinds of drugs that cause disturbance of mind and body are heroin, marijuana, tobacco, valium, cocaine and alcohol.

Drug addiction is caused by the environmental factors. A few important environmental factors that may cause drug addiction are bad peer influence and troubled domestic background. When young people remain in bad company and do experiments in the name of adventure, they may fall **prey** to addiction. The people who are dissatisfied and discontented with their lives may also resort to drug addiction in order to seek and escape from responsibilities of life.

The most important measure to be taken in this regard is the rehabilitation and recovery of a drug addict. In many countries, including Pakistan, addicts, their families and friends consider it a taboo to share their problem with others. They feel **embarrassed** to talk about it for fear of being declared an **outcast**. This not only makes the cure difficult but in most of the cases the addicts die due to lack of timely treatment and counselling. Rehabilitation centers are the best places for the recovery process of the addicts. Complete medical support and guidance is provided to these people in these centers. Drug abusers, therefore, must be taken to proper and certified rehabilitation centers where proper treatment and cure is available for them. However, this requires rapid identification of the problem of drug addiction and full cooperation of the victims with the team of these centers.
